THE HALL

The transformation is complete: two small old halls turned into a state-of-the-art, pillarless multi-purpose hall in a construction period of two years.

Facts and figures for the new Hall 1.

EXCAVATION WORK

- 65,000 m³ excavated soil (120,000 tons or 4,500 truck loads) – enough to fill up Düsseldorf’s Rheinturm 1.5 times

MATERIALS

- 2,112 m² floor space – roughly 5 basketball pitches
- 2,112 m² of solid oak parquet flooring, just under 7 tennis courts
- 2,000 T of steel
- 1,388 m² solid oak parquet flooring
- 2,000 T of steel

THE FLOORS

- 1,808 m² glass – 17 times the size of the famous Richter window at Cologne Cathedral
- 12,027 m² of floor space – more than 1.5 football pitches
- 12,027 m² of floor space – more than 1.5 football pitches
- 1,808 m² of floor space – more than 1.5 football pitches

THE GLASS FACADE

- 187,657 artificial stones (13,653 m²) – almost twice the size of Düsseldorf’s Burgplatz square
- 28,000 m³ of concrete
- 204 m high (16.5 m clearance) – almost as high as the Louvre Pyramid

METRICS FOR HALL 1

- 120,270 m² floor space – roughly 5 basketball pitches
- 204 m high (16.5 m clearance) – almost as high as the Louvre Pyramid
- 204 m high (16.5 m clearance) – almost as high as the Louvre Pyramid
