Fire prevention at the exhibition centre

During the development phase, most fires can be combated successfully with fire extinguishers. On the stands, a suitable fire extinguisher must be available during the setting-up and dismantling phases as well as during the event itself. You can order various commercial sizes and types. A hired fire extinguisher provides you with optimum protection against fire, as these are always checked and serviced prior to issue. Payment in cash at the stand.

Damage Prevention at your Trade Fair Stand

Danger! Even smoke from smouldering fires can cause extensive damage to electrical systems, sometimes leading to total write-off. Improper extinguishing agents used during fire-fighting may cause severe damage to the systems. In addition to major material damage, any breakdown of electrical systems can cause serious operational disruptions in the company. Included in the delivery is the labelling according to the accident prevention regulation VBG 125. The label must be attached conspicuously.

Protect your exhibition and property assets on the stand with corresponding equipment during the period of the exhibition. A suitable fire extinguisher with at least 10 extinguishing agent units (LE) must be kept available on the stands during setting-up and dismantling as well as during the event. On the stand itself, attention must be drawn to the location of the extinguisher in accordance with the accident prevention regulations BGV A8 (VBG 125). Upwards of a specific stand size, more than one fire extinguisher can be required. On two-level stands, a fire extinguisher must be kept available on each staircase from the upper level.

Payment in cash at the stand!
